Energy Saving Week

Adopting eco-friendly habits illuminates a path to sustainability, reducing environmental impact for future generations.

This week is Energy Saving Week!

There are lots of good reasons to try and save energy.

Better for the
environment

Saves money

We can all work together in school to save energy.

- Switch lights off when leaving the room
- Try not to put all the lights on in the classroom- can you open the blinds instead?
- Switch the board off when leaving the room

- Turn down radiators if possible
- Wear cardigans/jumpers instead of turning up the heating

- Turn off the taps when you've finished using them
- Try not to use more paper towels than needed to dry your hands
